| Submit Date | 12/04/2019 | Affects Version: build.v1.000.001 | Fix Version: build.v1.000.002 |
| Summary | Shopping Cart Counter badge shows wrong items count | | |
| Priority | Low | | |
| Severity | Medium | | |
| Product | Web Application - E-commerce | | |
| Component | Shopping Cart | Environment: | PROD |
| Relates To: | ECOMXXX | | |
| Platform | [Mac Book Pro] | | |
| OS | [MacOS] | | |
| Browser | [Google Chrome Version 73.0.3683.103] | | |
| URL | https://www.sancta-domenica.hr | | |

Description

In some cases, a shopping cart does not show the actual amount of items in it.

To reproduce this issue, you need to do the following steps:

- Log in with the same account at <https://www.sancta-domenica.hr> using two different clients (eg PC and Mobile).
- Change the content of a Shopping Cart on PC.
- Check the content of a Shopping Cart on Mobile.

Actual: The content is correct on both clients, but the counter badge on the cart has not been updated on another client.

Expected: Counter number shows correct and equal values on both Clients.
